

CYLINDER BLOCK [SKYACTIV-D 2.2]

id0110s5000500

Purpose, Function

- The cylinder block forms the cylinder and crankcase.

Construction

- The cylinder block consists of the upper cylinder block and lower cylinder block.
- The lightweight cylinder block is made of aluminum alloy with excellent heat dispersion.
- The cylinder block is an open deck type with excellent cooling performance.
- With the adoption of the lower cylinder block, the coupling rigidity of the transaxle and support rigidity of the crankshaft have been improved reducing engine vibration.
