

## SPARK PLUG [SKYACTIV-G 2.0, SKYACTIV-G 2.5]

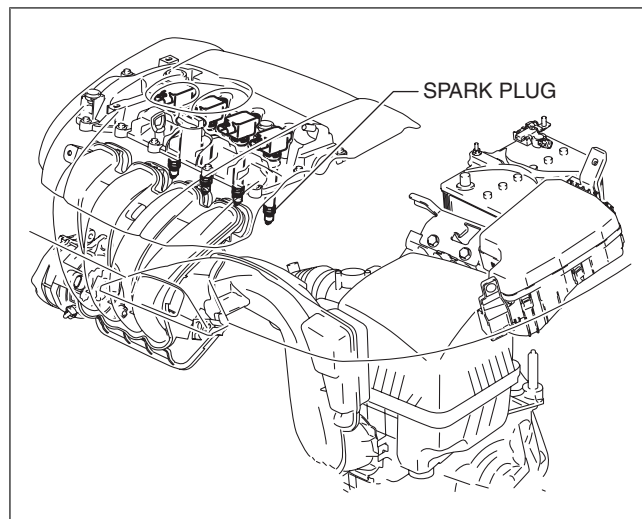

id0118i0101400

### Purpose, Function

- The spark plug generates spark, ignition of the air-fuel mixture occurs, and combustion of the air-fuel mixture is triggered.

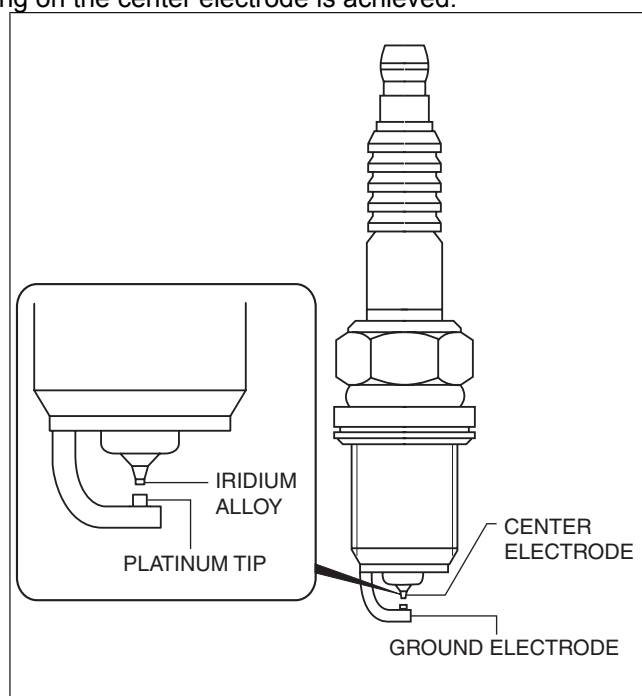

### Construction

- The spark plug is installed to the cylinder head.

ac5wzn00001029

- Iridium on the center electrode and platinum on the ground electrode are used (iridium spark plug).
- Because iridium has excellent durability, extreme thinning on the center electrode is achieved.
- The area contacting flame is decreased by extremely thinning the center and setting electrodes, and extinction action is reduced. Therefore, excellent ignition performance is achieved. (spark plug type: PE01-18-110, PE02-18-110)
