| DTC P0638:0 | 0 [SKYACTIV-G 2.0, SKYACTIV-G 2.5] | | | | | |
|--|--|--|--|--|--|--|
| DTC P0638:00 | l brottle valve actuator control range/nertormance problem | | | | | |
| | The PCM compares the actual TP with the target TP. If the difference is more than the threshold value, the PCM determines that there is a throttle valve actuator control range/performance problem. Plant and the purpose that there is a throttle valve actuator control range/performance problem. | | | | | |
| DETECTION | Diagnostic support note • This is a continuous monitor (CCM). | | | | | |
| CONDITION | | | | | | |
| | FREEZE FRAME DATA (Mode 2)/Snapshot data is available. | | | | | |
| | DTC is stored in the PCM memory. | | | | | |
| FAIL-SAFE | Restricts the upper limit of the engine speed. | | | | | |
| FUNCTION | • Stops drive-by-wire control (throttle valve is open at approx. 8 ° by return spring force) | | | | | |
| POSSIBLE CAUSE | *Throttle body connector or terminals malfunction *Short to ground in wiring harness between the following terminals: | | | | | |
