28	A/C DOES NOT WORK SUFFICIENTLY
DESCRIPTION	A/C compressor magnetic clutch does not engage when A/C switch is turned on.
POSSIBLE CAUSE	PCM DTC is stored. Instrument cluster malfunction (Does not receive A/C request signal from climate control unit or transmit it to PCM) Refrigerant pressure sensor malfunction Improper refrigerant changing amount
	 Open circuit in wiring harness between magnetic clutch terminal A and body ground A/C relay malfunction

Diagnostic Procedure

Diagno	Diagnostic Procedure						
STEP	INSPECTION	RES ULT S	ACTION				
1	VERIFY DTC Retrieve the PCM, instrument cluster and climate control unit DTCs using the M-MDS. (See ON-BOARD DIAGNOSTIC TEST)	Yes	Go to the applicable DTC inspection. (See DTC TABLE [SKYACTIV-D 2.2].) (See DTC TABLE [INSTRUMENT CLUSTER].) (See DTC TABLE [FULL-AUTO AIR CONDITIONER].)				
	[SKYACTIV-D 2.2].) (See DTC INSPECTION [INSTRUMENT CLUSTER].) (See DTC DISPLAY [FULL-AUTO AIR CONDITIONER].)	No	Go to the next step.				
	Are any DTCs present?						
2	DETERMINE IF MALFUNCTION CAUSE IS A/C	Yes	Go to the next step.				
	RELAY CONTROL SIGNAL OR A/C REQUEST	No	Go to Step 6.				
	• Access the PCM PID ACCS using the M-MDS.						
	(See ON-BOARD DIAGNOSTIC TEST						
	[SKYACTIV-D 2.2].)						
	Start the engine and idle it.						
	Turn the ACCS PID to ON from OFF using the						
	M-MDS simulation function.						
	Is the magnetic clutch engaged?						
3	DETERMINE IF MALFUNCTION CAUSE IS	Yes	Go to the next step.				
	REFRIGERANT PRESSURE SENSOR OR	No	Go to Step 5.				
	OTHER						
	Access the PCM PID AC_REQ using the M-MDS.						
	(See ON-BOARD DIAGNOSTIC TEST						
	[SKYACTIV-D 2.2].)						
	• Start the engine and idle it.						
	Monitor the AC REQ PID while turning on and						
	off the air conditioner using the switch on the						
	control panel.						
	• Is the AC_REQ PID value normal?						
4	(See PCM INSPECTION [SKYACTIV-D 2.2].)	Vaa	Inspect the following:				
4	INSPECT REFRIGERANT PRESSURE SENSOR	Yes	Inspect the following: • Refrigerant charging amount				
	• Inspect the refrigerant pressure sensor.		A/C compressor seized				
	(See REFRIGERANT PRESSURE SENSOR		If there is any malfunction:				
	INSPECTION [MANUAL AIR CONDITIONER].)		Repair or replace the malfunctioning part according to				
	(See REFRIGERANT PRESSURE SENSOR		the inspection results, then go to Step 8.				
	INSPECTION [FULL-AUTO AIR	No	Replace the refrigerant pressure sensor, then go to Step 8.				
	CONDITIONER].)		(See REFRIGERANT PRESSURE SENSOR REMOVAL/				
	Is the refrigerant pressure sensor normal?		INSTALLATION [MANUAL AIR CONDITIONER].)				
			(See REFRIGERANT PRESSURE SENSOR REMOVAL/				
			INSTALLATION [FULL-AUTO AIR CONDITIONER].)				

5 DETERMINE IF MALFUNCTION CAUSE IS A/C RELAY CONTROL SIGNAL OR MAGNETIC CLUTCH • Start the engine and idle it. • Access the PCM PID ACCS using the M-MDS. (See ON-BOARD DIAGNOSTIC TEST [SKYACTIV-D 2.2].) • Turn the ACCS PID to ON from OFF using the M-MDS simulation function. • Measure the voltage at the magnetic clutch terminal A (wiring harness-side). • Is the voltage 10.5 V or more? 6 INSPECT IF MALFUNCTION CAUSE IS MAGNETIC CLUTCH GROUND CIRCUIT • Switch the ignition off. • Disconnect the magnetic clutch connector. • Inspect for continuity between magnetic clutch terminal A (part-side) and body ground. • Is there continuity? No Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [MANU/CONDITIONER].) • If there is any malfunction: — Replace the magnetic clutch, then go to Step 8. • If there is no malfunction: — Repair or replace the malfunctioning part acc the inspection results, then go to Step 8. • If there is no malfunction: — Replace the A/C compressor, then go to Step 8.					
RELAY CONTROL SIGNAL OR MAGNETIC CLUTCH • Start the engine and idle it. • Access the PCM PID ACCS using the M-MDS. (See ON-BOARD DIAGNOSTIC TEST [SKYACTIV-D 2.2].) • Turn the ACCS PID to ON from OFF using the M-MDS simulation function. • Measure the voltage at the magnetic clutch terminal A (wiring harness-side). • Is the voltage 10.5 V or more? 6 INSPECT IF MALFUNCTION CAUSE IS MAGNETIC CLUTCH OR MAGNETIC CLUTCH GROUND CIRCUIT • Switch the ignition off. • Disconnect the magnetic clutch connector. • Inspect for continuity between magnetic clutch terminal A (part-side) and body ground. • Is there continuity? No Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [MANU/CONDITIONER].) • If there is any malfunction: — Replace the magnetic clutch, then go to Step 8. • If there is no malfunction: — Repair or replace the malfunctioning part accepted in the page of the A/C compressor, then go to Step 8. • If there is no malfunction: — Replace the A/C compressor, then go to Step 8.					
Start the engine and idle it. Access the PCM PID ACCS using the M-MDS. (See ON-BOARD DIAGNOSTIC TEST [SKYACTIV-D 2.2].) Turn the ACCS PID to ON from OFF using the M-MDS simulation function. Measure the voltage at the magnetic clutch terminal A (wiring harness-side). Is the voltage 10.5 V or more? INSPECT IF MALFUNCTION CAUSE IS MAGNETIC CLUTCH GROUND CIRCUIT Switch the ignition off. Disconnect the magnetic clutch connector. Inspect for continuity between magnetic clutch terminal A (part-side) and body ground. Is there continuity? Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [MANUACONDITIONER].) (See MAGNETIC CLUTCH INSPECTION [FULL-ACONDITIONER].) If there is any malfunction: Replace the magnetic clutch, then go to Step 8. If there is no malfunction: Replace the A/C compressor, then go to Step 8.					
Access the PCM PID ACCS using the M-MDS. (See ON-BOARD DIAGNOSTIC TEST [SKYACTIV-D 2.2].) Turn the ACCS PID to ON from OFF using the M-MDS simulation function. Measure the voltage at the magnetic clutch terminal A (wiring harness-side). Is the voltage 10.5 V or more? INSPECT IF MALFUNCTION CAUSE IS MAGNETIC CLUTCH OR MAGNETIC CLUTCH GROUND CIRCUIT Switch the ignition off. Disconnect the magnetic clutch connector. Inspect for continuity between magnetic clutch terminal A (part-side) and body ground. Is there continuity? Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [MANUACONDITIONER].) (See MAGNETIC CLUTCH INSPECTION [FULL-ACONDITIONER].) If there is any malfunction: — Replace the magnetic clutch, then go to Step Inspect the A/C compressor. (poor contact to groute in the inspection results, then go to Step 8.) If there is no malfunction: — Replace the A/C compressor, then go to Step 8.					
(See ON-BOARD DIAGNOSTIC TEST [SKYACTIV-D 2.2].) • Turn the ACCS PID to ON from OFF using the M-MDS simulation function. • Measure the voltage at the magnetic clutch terminal A (wiring harness-side). • Is the voltage 10.5 V or more? 6 INSPECT IF MALFUNCTION CAUSE IS MAGNETIC CLUTCH OR MAGNETIC CLUTCH GROUND CIRCUIT • Switch the ignition off. • Disconnect the magnetic clutch connector. • Inspect for continuity between magnetic clutch terminal A (part-side) and body ground. • Is there continuity? Yes Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [MANUACONDITIONER].) (See MAGNETIC CLUTCH INSPECTION [FULL-ACONDITIONER].) • If there is any malfunction: — Replace the magnetic clutch, then go to Step Inspect the A/C compressor. (poor contact to grounce in the inspection results, then go to Step 8.) • If there is no malfunction: — Replace the A/C compressor, then go to Step 8.					
SKYACTIV-D 2.2].) Turn the ACCS PID to ON from OFF using the M-MDS simulation function. Measure the voltage at the magnetic clutch terminal A (wiring harness-side). Is the voltage 10.5 V or more? INSPECT IF MALFUNCTION CAUSE IS MAGNETIC CLUTCH OR MAGNETIC CLUTCH GROUND CIRCUIT Switch the ignition off. Disconnect the magnetic clutch connector. Inspect for continuity between magnetic clutch terminal A (part-side) and body ground. Is there continuity? Inspect the magnetic clutch inspection [MANUA CONDITIONER].) If there is any malfunction: Replace the magnetic clutch, then go to Step 8. If there is no malfunction: Replace the A/C compressor, then go to Step 8. If there is no malfunction: Replace the A/C compressor, then go to Step 8.					
Turn the ACCS PID to ON from OFF using the M-MDS simulation function. Measure the voltage at the magnetic clutch terminal A (wiring harness-side). Is the voltage 10.5 V or more? INSPECT IF MALFUNCTION CAUSE IS MAGNETIC CLUTCH OR MAGNETIC CLUTCH GROUND CIRCUIT Switch the ignition off. Disconnect the magnetic clutch connector. Inspect for continuity between magnetic clutch terminal A (part-side) and body ground. Is there continuity? Tyes Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [MANUACONDITIONER].) (See MAGNETIC CLUTCH INSPECTION [FULL-ACONDITIONER].) If there is any malfunction: Replace the magnetic clutch, then go to Step 8. If there is no malfunction: Replace the A/C compressor, then go to Step 8.					
M-MDS simulation function. • Measure the voltage at the magnetic clutch terminal A (wiring harness-side). • Is the voltage 10.5 V or more? 6 INSPECT IF MALFUNCTION CAUSE IS MAGNETIC CLUTCH GROUND CIRCUIT • Switch the ignition off. • Disconnect the magnetic clutch connector. • Inspect for continuity between magnetic clutch terminal A (part-side) and body ground. • Is there continuity? M-MOS simulation function. • Inspect IF MALFUNCTION CAUSE IS MAGNETIC CLUTCH INSPECTION [MANUACONDITIONER].) • Switch the ignition off. • Disconnect the magnetic clutch connector. • Inspect for continuity between magnetic clutch terminal A (part-side) and body ground. • Is there continuity? No Inspect the A/C compressor. (poor contact to grounce the inspection results, then go to Step 8.) • If there is no malfunction: — Replace the A/C compressor, then go to Step 8.					
Measure the voltage at the magnetic clutch terminal A (wiring harness-side). Is the voltage 10.5 V or more? INSPECT IF MALFUNCTION CAUSE IS MAGNETIC CLUTCH GROUND CIRCUIT Switch the ignition off. Disconnect the magnetic clutch connector. Inspect for continuity between magnetic clutch terminal A (part-side) and body ground. Is there continuity? Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [MANUACONDITIONER].) (See MAGNETIC CLUTCH INSPECTION [FULL-ACONDITIONER].) If there is any malfunction: — Replace the magnetic clutch, then go to Step 8. If there is no malfunction: — Replace the A/C compressor, then go to Step 8. If there is no malfunction: — Replace the A/C compressor, then go to Step 8.					
terminal A (wiring harness-side). • Is the voltage 10.5 V or more? 6 INSPECT IF MALFUNCTION CAUSE IS MAGNETIC CLUTCH OR MAGNETIC CLUTCH GROUND CIRCUIT • Switch the ignition off. • Disconnect the magnetic clutch connector. • Inspect for continuity between magnetic clutch terminal A (part-side) and body ground. • Is there continuity? Ves (See MAGNETIC CLUTCH INSPECTION [MANUACONDITIONER].) (See MAGNETIC CLUTCH INSPECTION [FULL-ACONDITIONER].) • If there is any malfunction: — Replace the magnetic clutch, then go to Step Inspect the A/C compressor. (poor contact to groute of the inspection results, then go to Step 8.) • If there is no malfunction: — Replace the A/C compressor, then go to Step 8.					
INSPECT IF MALFUNCTION CAUSE IS MAGNETIC CLUTCH OR MAGNETIC CLUTCH GROUND CIRCUIT • Switch the ignition off. • Disconnect the magnetic clutch connector. • Inspect for continuity between magnetic clutch terminal A (part-side) and body ground. • Is there continuity? • Is there continuity? Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [MANUAL CONDITIONER].) (See MAGNETIC CLUTCH INSPECTION [FULL-AL CONDITIONER].) If there is any malfunction: Replace the magnetic clutch, then go to Step of the inspection results, then go to Step of the inspect of the inspection results, then go to Step of the inspect of the magnetic clutch. Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [MANUAL CONDITIONER].) Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [FULL-AL CONDITIONER].) Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [FULL-AL CONDITIONER].) Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [FULL-AL CONDITIONER].) Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [FULL-AL CONDITIONER].) Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [FULL-AL CONDITIONER].) Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [FULL-AL CONDITIONER].) Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [FULL-AL CONDITIONER].) Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [FULL-AL CONDITIONER].) Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [FULL-AL CONDITIONER].) Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [FULL-AL CONDITIONER].) Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [FULL-AL CONDITIONER].) Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [FULL-AL CONDITIONER].) Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [FUL					
INSPECT IF MALFUNCTION CAUSE IS MAGNETIC CLUTCH OR MAGNETIC CLUTCH GROUND CIRCUIT Switch the ignition off. Disconnect the magnetic clutch connector. Inspect for continuity between magnetic clutch terminal A (part-side) and body ground. Is there continuity? Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [MANUAL CONDITIONER].) (See MAGNETIC CLUTCH INSPECTION [FULL-ACONDITIONER].) If there is any malfunction: Replace the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [FULL-ACONDITIONER].) Inspect the magnetic clutch. (See MAGNETIC CLUTCH INSPECTION [FULL-ACONDITIONER].) If there is any malfunction: Repair or replace the malfunctioning part account to grount the inspection results, then go to Step 8. If there is no malfunction: Replace the A/C compressor, then go to Step 8.					
MAGNETIC CLUTCH OR MAGNETIC CLUTCH GROUND CIRCUIT • Switch the ignition off. • Disconnect the magnetic clutch connector. • Inspect for continuity between magnetic clutch terminal A (part-side) and body ground. • Is there continuity? No (See MAGNETIC CLUTCH INSPECTION [MANUAL CONDITIONER].) (See MAGNETIC C					
GROUND CIRCUIT • Switch the ignition off. • Disconnect the magnetic clutch connector. • Inspect for continuity between magnetic clutch terminal A (part-side) and body ground. • Is there continuity? No CONDITIONER].) • If there is any malfunction: — Replace the magnetic clutch, then go to Step Inspect the A/C compressor. (poor contact to grounce the inspection results, then go to Step 8.) • If there is no malfunction: — Replace the A/C compressor, then go to Step 8.	L AIR				
 Switch the ignition off. Disconnect the magnetic clutch connector. Inspect for continuity between magnetic clutch terminal A (part-side) and body ground. Is there continuity? Inspect the A/C compressor. (poor contact to grounce of the inspection results, then go to Step 8). If there is no malfunction: Replace the magnetic clutch, then go to Step 8. If there is no malfunction:					
 Inspect for continuity between magnetic clutch terminal A (part-side) and body ground. Is there continuity? Inspect the A/C compressor. (poor contact to ground the inspection results, then go to Step 8. If there is any malfunction: Repair or replace the malfunctioning part account the inspection results, then go to Step 8. If there is no malfunction:	UTO AIR				
terminal A (part-side) and body ground. • Is there continuity? No Inspect the A/C compressor. (poor contact to groundly the end of					
 Inspect the A/C compressor. (poor contact to grountly) If there is any malfunction: Repair or replace the malfunctioning part accent the inspection results, then go to Step 8. If there is no malfunction: Replace the A/C compressor, then go to Step 8. 					
If there is any malfunction: Repair or replace the malfunctioning part acc the inspection results, then go to Step 8. If there is no malfunction: Replace the A/C compressor, then go to Step 8.					
 Repair or replace the malfunctioning part accepted the inspection results, then go to Step 8. If there is no malfunction: Replace the A/C compressor, then go to Step 	ıd)				
the inspection results, then go to Step 8. • If there is no malfunction: — Replace the A/C compressor, then go to Step 8.					
If there is no malfunction: Replace the A/C compressor, then go to Ste	ording to				
Replace the A/C compressor, then go to Step					
	. 8				
(internal circuit open)	, o.				
7 INSPECT A/C RELAY Yes Go to the next step.					
Switch the ignition off. No Replace the A/C relay, then go to the next step.					
• Remove the A/C relay.					
• Inspect the A/C relay.					
(See RELAY INSPECTION.)					
• Is the A/C relay normal?					
8 Verify the test results.					
• If normal, return to the diagnostic index to service any additional symptoms.					
(See SYMPTOM DIAGNOSTIC INDEX [SKYACTIV-D 2.2].)					
 If a malfunction remains, inspect the related Service Information and perform the repair or diagnosis. If the vehicle is repaired, troubleshooting is completed. 	1				
 If the vehicle is not repaired, troubleshooting is completed. If the vehicle is not repaired or additional diagnostic information is not available, replace the PCM. 					
(See PCM REMOVAL/INSTALLATION [SKYACTIV-D 2.2].)
