## NO.1 AIR BAG SYSTEM WARNING LIGHT DOES NOT ILLUMINATE

id080300800200

| 1 | Air bag system warning light does not illuminate. |
|---|---|
| DETECTION CONDITION | Air bag system warning light does not illuminate while the air bag system is performing initialization. |
| POSSIBLE CAUSE | • Air bag system warning light circuit malfunction<br>• Air bag system warning light (LED) malfunction<br>• Instrument cluster malfunction<br>• Communication error between SAS control module and instrument cluster<br>• SAS control module malfunction |

### Diagnostic Procedure

| STEP | INSPECTION | | ACTION |
|---|---|---|---|
| 1 | **INSPECT OTHER WARNING AND INDICATOR LIGHTS CIRCUIT IN INSTRUMENT CLUSTER**<br>• Switch the ignition ON (engine off or on).<br>• Do other warning and indicator lights illuminate? | Yes | Go to the next step. |
| | | No | Inspect the instrument cluster power supply system and ground system, then go to Step 3. |
| 2 | **INSPECT DTCS IN SAS CONTROL MODULE**<br>• Inspect the DTC for the SAS control module on-board diagnostic system.<br>• Have DTCs been recorded in memory? | Yes | Perform the applicable DTC inspection. (See DTC TABLE.) Go to the next step. |
| | | No | Go to the next step. |
| 3 | **VERIFY WHERE MALFUNCTION IS IN WARNING LIGHTS INDICATION CIRCUIT OR ELSEWHERE**<br>• Turn on all warning lights and indicator lights using the instrument cluster PID WL+IL of simulation function using the M-MDS. (See ACTIVE COMMAND MODES INSPECTION [INSTRUMENT CLUSTER].)<br>• Do other waning and indicator lights illuminate? | Yes | Go to the next step. |
| | | No | Replace the instrument cluster. (See INSTRUMENT CLUSTER REMOVAL/INSTALLATION.)<br>Then go to Step 5. |
| 4 | **INSPECT DTCS IN INSTRUMENT CLUSTER**<br>• Inspect the DTC for the instrument cluster on-board diagnostic system. (See DTC INSPECTION [INSTRUMENT CLUSTER].)<br>• Have DTCs been recorded in memory? | Yes | Perform the applicable DTC inspection, then go to Step 8. (See DTC TABLE [INSTRUMENT CLUSTER].) |
| | | No | Go to the next step. |
| 5 | **CONFIRM THAT MALFUNCTION SYMPTOMS DO NOT RECUR AFTER REPAIR**<br>• Switch the ignition ON (engine off or on).<br>• Does the air bag system warning light operate properly? | Yes | Verify that there are no DTCs in the memory. If there are no DTCs, the troubleshooting is completed. |
| | | No | Recheck malfunction symptoms, then repeat from Step 1 if malfunction recurs. |
